

**SYSTEM, METHOD, AND ARTICLE OF MANUFACTURE FOR SELECTING  
A VENDOR OF USER-DEFINED PRODUCTS**

**ABSTRACT**

A system, method and article of manufacture are provided for selecting a vendor based on a list of user-selected products. A plurality of product identifiers are received from a user. Each product identifier is associated with a particular product. A list of the products is generated. A search is made for vendors of the products on the list. A vendor of the products is selected based on predetermined criteria. Information about the selected vendor is output.
